

## **Camp Rainbow Website Re-Design | UI Plan**

**Website:** [www.camprainbow.com](http://www.camprainbow.com)

### **Interactive Elements**

1. Mobile Hamburger Menu
  - Slides out from right side when user clicks on the “hamburger”
2. Accordion
  - Used on FAQ page to showcase the many questions
3. Read More Open & Close
  - Used on the Camps page to condense the pages down (each camp used to have it's own page with little content on each). One paragraph will be visible to the user and they can click read more to continue reading.
4. Jokes API
  - Initialized from “Jokes One”, this joke of the day will update each day from the database. This feature will be on the homepage
